Professional Summary

Highly motivated Software Engineer with strong expertise in full stack web development, specializing in ASP.NET Core, Web API, and React JS. Proven experience in designing and developing responsive applications, optimizing backend systems, and delivering practical software solutions through multiple real-world and academic projects. Strong foundation in frontend and backend technologies with excellent collaboration, code management, and continuous learning abilities.

Education

BS Software Engineering

University of Mianwali

2021 – 2025

CGPA: 3.09 / 4.00

Technical Skills

- Languages: C, C++, SQL, JavaScript
- Frontend: HTML5, CSS3, JavaScript, React JS
- Backend: ASP.NET Core, Web API
- Database: SQL
- Version Control & Collaboration: GitHub, Team Collaboration
- Development Strengths: Code Optimization, Problem Solving, Project Management

Projects

- **Online Automobile Community (Final Year Project):** Comprehensive web-based platform for automobile enthusiasts
- **Calculator Web App:** Developed using HTML, CSS, JavaScript
- **Country Food Explorer App:** React JS application integrated with APIs for country and food data
- **MovieZone Clone:** Dynamic React JS movie platform clone
- **ASP.NET Core Mini Projects:** Backend Web API development with React frontend integration

Current Professional Development

Actively working on enhancing full stack development capabilities through ASP.NET Core and React JS projects, focusing on scalable backend APIs, optimized frontend experiences, and enterprise-grade software development standards.

Career Objective

Seeking opportunities as a professional Software Engineer / Full Stack Developer where I can leverage my expertise in ASP.NET Core, React JS, and software engineering principles to contribute to impactful projects while advancing technical and professional growth.
